46	I feel that the syllabus needs to be adjusted for the fashion program. Too much time was focused on drawing and the computer stuff, I needed more time for sewing. Ms Chang is very educated and definitely knows her stuff, however, she can be a bit of a perfectionist, which can take up some time on my work and get in the way of finishing my project. The computer stuff was draining. It was hard to watch Ms Chang demonstrate on the computer since it's such a small screen with everyone huddled around her. However, Ms Chang is very smart and talented.	6/8/2017 8:24 PM

For me the most important thing after this course was finding a job I don't want to feel that I wasted my time. 76	Im very grateful to be introduced to WVOC for ADULT education, its affordable, instructors go the extra mile to help you achieve your goals, taking classes at WVOC has helped me begin to change my life for the better by wanting to get as much education as I can. It also showed me that I CAN do it. I wish WVOC offered more classes and was opened all day for more class times to be available. WVOC has changed my attitude toward education and community service. At age 50, this was my first time being active in student council.	6/8/2017 10:27 AM
77	I am very happy with my education here at WVOC. It has helped me enter a new job field and I feel well prepared. If the CTE program was not available I probably would be stuck in a job I don't like. Ms. Dorsey and Ms. Alvarez are very dedicated teachers who really want their students to succeed. I will add that I will continue my education at Pierce College in the Fall. Please continue offering these programs here	6/8/2017 10:16 AM
78	I have two more classes to finish in my Health Information Tech program at West Valley Occupational Center. It has been a educational and goal achieving experience for me. But after two more classes, "how am I going into the job field that I set my goal for?" is a fearful question. I wish there was an internship that could help me to connet to the real job field.	6/8/2017 10:13 AM

94	This school meet my spectations and the teachers explain very well	6/7/2017 8:09 PM
95	The program is good. But it can greatly improve. To whom ever It corresponds to improve these programs, in my humble opinion, I'd recommend talking with the students in a more direct manner. And try to more accurately fulfill the needs of the students. That is to better prepare them for a job outside the program. And in my opinion that involves focusing more on skill building more specifically the practical skills dealing with the trade and less on the curriculum. Much of which will not be applied to job. In short words focus more on building fundamentals. If the purpose of this program is to best serve others. Understand the field and build a program around the fundamentals of the field rather than building a curriculum straight off the book. I wrote this with good intentions of giving some constructive criticism and hope it is well received. Thank You :)	6/7/2017 8:09 PM

118	I really like this school very much, being it my first time attending. I would also like to add, that my instructor, Ms. Dorsey HIT/1 Terminology, she is brilliant, skilled, thorough in her lesson to her students. What a gem we've been blessed to have as a teacher. She makes her class, wishing we could have her as our instructor, til we leave this school extremely skilled ourselves.	6/7/2017 11:38 AM

150	Im very satisfied with the school and the teacher. We need classes with younger or older age groups	6/7/2017 11:00 AM
151	Naturally most here are fundamentally okay with the school but naturally wish more options were available. Many wish to expand their job opportunities as a handful of students are those fresh out of high school and are unable to pay for a degree or perhaps fear debt.The present school offers job certificates at a reasonable price and such which is good however it would be helpful if the school had a program that would help place graduates into such a job field. As well as many being here are very diverse ranging from young to elderly.One class i would hope to see in the future would be craftsmanship type jobs or perhaps apprenticeships such as wood-shop, forging, glassblowing etc. Such jobs are highly skilled and are dying out and having your school introduce such opportunities would increase numbers and help place the schools name in a wide verse of fields as it would catch others attention.	6/7/2017 10:59 AM
